CAREER OBJECTIVE

Android developer with hands-on experience in Kotlin, Jetpack Compose, Firebase, MVVM, and clean architecture. Built AI-powered Android applications with real-time features, authentication, navigation, and location tracking. Seeking an Android internship to contribute to production-ready mobile apps and grow in modern mobile development.

TECHNICAL SKILLS

Programming Languages: Kotlin, Python, SQL, C

Android Development: Jetpack Compose, MVVM, Clean Architecture, Coroutines, StateFlow, Compose Navigation, Koin, Firebase, Retrofit, Room, WorkManager, OkHttp, Coil, OpenStreetMap, FCM

Backend / Tools: Friebase, Supabase, REST API, FastAPI, JSON, Android Studio, Git, GitHub, Streamlit

Additional Skills: Machine Learning, Deep Learning, NLP basics, Transformers basics, GenAI learning, OOP concepts

PROJECTS

AI Sales Visit Logger

Source Code: 🌐 [GitHub Repository](#)

- **Tech Stack:** Kotlin, Jetpack Compose, MVVM, Clean Architecture, Room, WorkManager, Firebase, Gemini API, Sarvam AI Speech-to-Text.
- Built an offline-first sales visit logging app that converts raw notes into structured CRM-ready summaries using AI.
- Added audio recording, speech-to-text, and automatic background sync for a smooth field workflow.
- Used Gemini to generate meeting summary, pain points, action items, next steps, emotion, and deal probability.

College Bus Tracking App (Driver + Student)

Source Code: 🌐 [Driver App](#) | 🌐 [Student App](#)

- **Tech Stack:** Kotlin, Jetpack Compose, MVVM, Clean Architecture, Firebase, OpenStreetMap, Foreground Service, Coroutines, StateFlow.
- Built a real-time bus tracking system where the driver app shares live GPS data and the student app renders movement on maps.
- Implemented continuous location sharing using Foreground Service and reactive UI updates with StateFlow.
- Created a practical location-based Android system with Firebase Authentication and live tracking.

Shopping Customer App (Jetpack Compose)

Source Code: 🌐 [GitHub Repository](#)

- **Tech Stack:** Kotlin, Jetpack Compose, Firebase, Koin DI, MVVM, UseCase, Compose Navigation, Realtime Database, Firebase Auth, FCM.
- Built a modern Android e-commerce app with 100% Jetpack Compose UI, dark/light theme support, and Firebase authentication.
- Implemented real-time cart, wishlist, orders, and search with nested navigation graphs and single-ViewModel architecture.

Customer Churn Prediction System

Source Code: 🌐 [GitHub Repository](#)

- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, FastAPI, Streamlit.
- Developed a machine learning application to predict telecom customer churn with a simple real-time interface.

EDUCATION

Dr. A. P. J. Abdul Kalam Technical University
B.Tech Specialization in AI, CGPA: 7.53

2027 – Present
Meerut, India
